★ HOMES FOR ALL AMERICA ★ BLUE PRINTS AVAILABLE ★

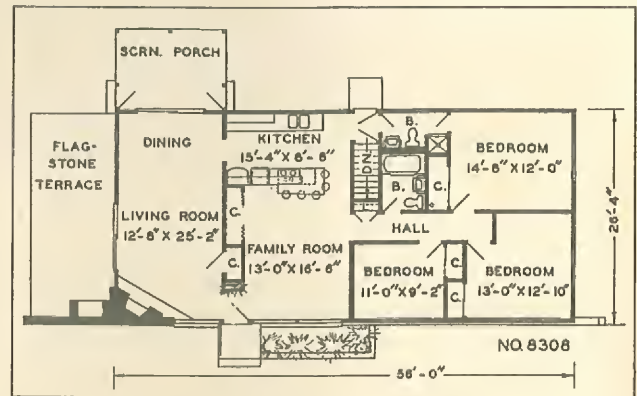

The HOUSE on the Cover

No. 8308 — The vertical and horizontal siding with stone trim make this an attractive home. The traffic ways of this home make it easy to get from one part of the house to another without disturbing the other occupants. The front entrance permits you to go into the living room or the family room. The rear entrance permits you to enter the kitchen or through one bathroom to the sleeping area. The corner fireplace in the living room will add to your enjoyment as well as to the large terrace and the screened in porch.

COMPLETE PLANS AVAILABLE

Complete working plans, specifications and mill lists are available for every design shown in any of the GARLINGHOUSE plan books. The plans are complete and ready for the builder to start construction of the home. The moderate price of these plan sets represents your best investment when building, since you know in advance what you are getting, thus avoiding misunderstanding.

THE PLANS, SPECIFICATIONS, LUMBER AND MILL LISTS as we have them made up for the designs in our books are sufficient and further details are not needed by any competent builder.

MINOR ALTERATIONS CAN BE MADE BY BUILDERS—It is impractical to change our tracings to show alterations, but minor alterations in design, material substitutions, etc., can be made by any competent builder without going to the expense of making special plans, which usually cost several times the price of our stock plans.

Complete plan sets when ordered will be mailed by parcel post (or air mail anywhere in U. S. if 75c per plan additional is included) within one day after your order has been received by The L. F. Garlinghouse Company.

TO OBTAIN COST ESTIMATES—The square footage is given for each plan to assist in figuring estimates. An estimate of what it will cost to erect any house illustrated in any of our books, in your locality, may be obtained by consulting your local builder.

ALL PLANS SENT ON MONEY BACK GUARANTEE—All Garlinghouse Plans are sent on a "Money Back If You're Not Satisfied" Guarantee. You have five full days after receiving the plans to study them over and to decide if they will serve your purpose. Plans which are not satisfactory may be returned for prompt exchange or refund.

ORDER YOUR PLANS THIS SIMPLE, EASY WAY!

USE THE HANDY ORDER BLANK ATTACHED! Or just send us your name and address with the plan number from the book and the number of sets you want along with your remittance and we'll have them in the mail within 24 hours after receipt of your order. Garlinghouse plans are complete and the house can be constructed from only one set of plans. However, in most cases, it is wise to include three or four extra sets in your order—one for the builder, a set for your city building department, a set or two for financing, if a loan is required, and of course, you will want a set for yourself to check on the construction as it progresses. Here's what you get:

PLANS—The complete working plans consist of prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-fourth inch to one foot. Also, a plot plan in blank to be filled locally.

SPECIFICATIONS—The specification lists in detail (to be filled in by

you and your builder) the construction of the house from the excavation to the final decoration.

LUMBER AND MILL LISTS—The lumber and mill lists consist of an itemized list of lumber and mill materials needed to construct the building and state where each item should be used.

Select the design for your new home from a Garlinghouse Plan Book and send for the complete plans, specifications, lumber and mill lists. Secure them from your dealer, Loan Company, or The L. F. Garlinghouse Company, Inc., Topeka, Kansas. Plans for every design in this book and all the books listed on the back cover are available for prompt shipment on receipt of order.

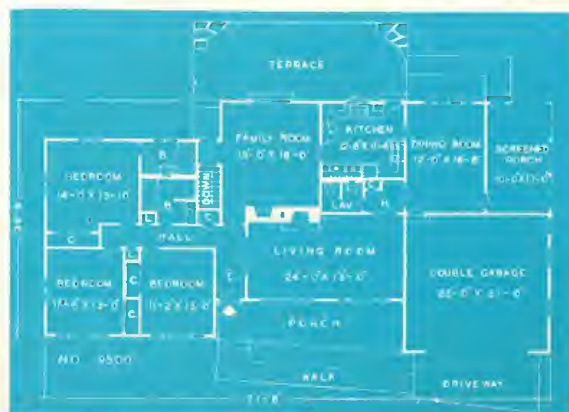

No. 9500—The distinctive character of this contemporary design makes it stand out among all others. Hall space has been kept at a minimum and yet the circulation through the house is excellent. A separate dining room is provided so the family room can be devoted entirely to family living. The kitchen contains adequate cabinet space as well as a built-in range and oven and washer and dryer space. The half bath is conveniently located. A basement is specified on the plans but can easily be omitted using the stairway space for the furnace and water heater and enclosing part of the screened porch for storage room. The large living room windows are partially shaded by the wide roof overhang and the open eggcrate joists.

Into the development of these plans has been packed our 50 years' experience helping thousands of families build homes of maximum quality at minimum cost.

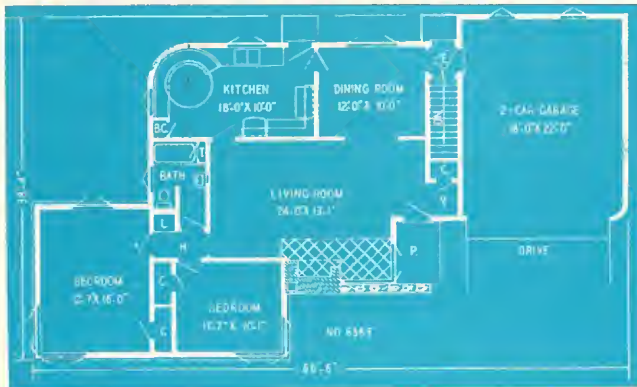

No. 8108—This distinctive ranch home will be the envy of the neighborhood. The outstanding exterior will certainly attract attention and the floor plan will meet the approval of the most discriminating homemaker. The rooms are extra large and arranged to eliminate unnecessary cross traffic. Placing the foyer at the end of the living room offers many possibilities for furniture groupings around the fireplace and picture window.

No. 8086—A very popular three bedroom ranch-style design. Note how skillfully the rooms have been arranged to permit easy passage between them. From the entrance foyer, it is possible to enter any of the rooms. The dining room has been placed in one corner off the living room out of the way of unnecessary traffic from the kitchen to other rooms. The room shown as a den may be used as the third bedroom. Brick veneer is shown for exterior walls.

No. 5117—An ideal plan for a suburban setting. This ranch house is adaptable for all sections of the country and has been planned for the comfort of the owners. Stone veneer is shown across the front of the kitchen and for the entire bedroom wing, and the balance of the exterior walls are finished with siding. An interesting feature is the distinct division of the plan into sleeping, living and working areas.

Removability

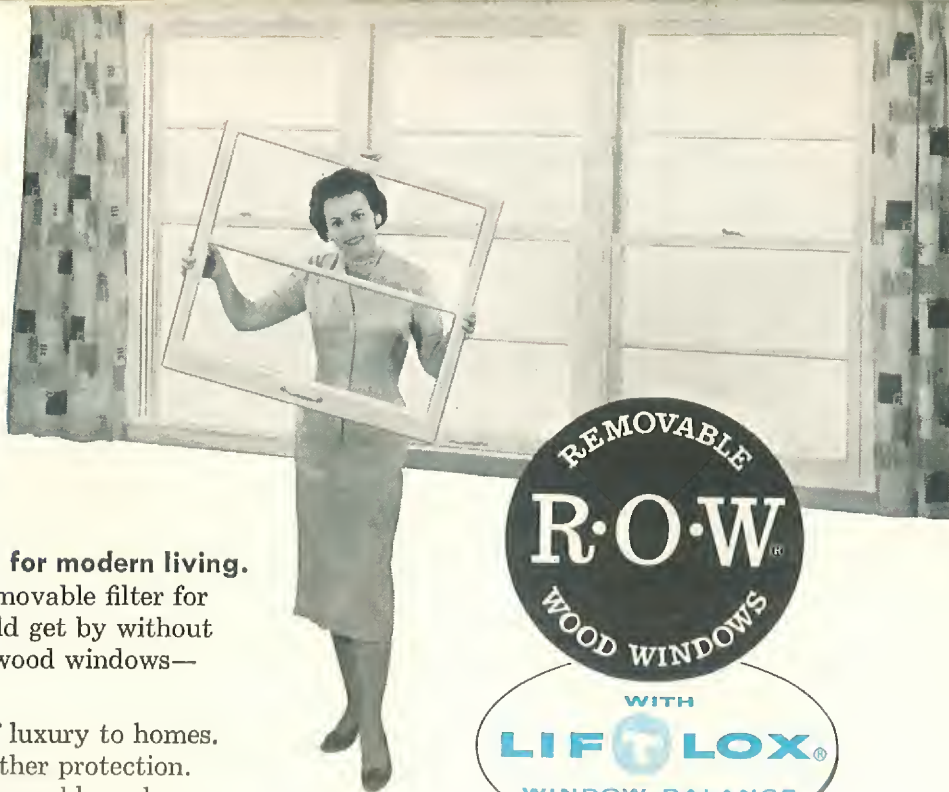

**makes the
big difference**

Modern homes are equipped for modern living.

You could get by without a removable filter for your vacuum cleaner. You could get by without the convenience of removable wood windows—but why should you?

Wood windows add the look of luxury to homes. They provide much better weather protection. The best wood windows are removable and R. O. W. Windows are the finest of all removable windows. Why settle for less in your home?

R·O·W and LIF-T-LOX are registered trade-marks of the R·O·W Sales Company

Here is valuable information

TO PROSPECTIVE OWNERS OF A NEW HOME

The days of desperate building and *desperation* acceptance of anything with a roof on it are over. Today, most families desiring a new home have time to choose, or to plan for building, or a supply of new homes already built from which to choose. Because, to most families, a new home is a once-in-a-lifetime undertaking as well as the largest single investment, there are several very vital considerations.

It is important you know how the cost and value of your new home is controlled by two basic building methods.

1. Large tract developments of low priced homes built for volume sales.

You have no choice of plans except the few variations offered by the developer. There's no choice of materials, equipment or appliances. The builder buys from the manufacturer who gives him the best discount for the products he wants to put in his houses. The well advertised brands in his "sales package" do not always appear in the finished houses. Before buying, check with families who have purchased such houses.

2. Custom-built homes—built on order.

Here you have complete freedom of choice in plans, materials, equipment, appliances and the builder. These homes are generally built by one of four methods.

- The owner-builder who "administers" the work by "subcontracting" the various phases of construction. He selects everything to be used, pays the bills, etc. In this group is the "do-it-yourself" builder-owner and the "finish-it-yourself" owner.
- The owner who hires a general contractor to do the job to the owner's specifications.
- The small speculative builder who puts up only a few houses a year. His purchases of materials, equipment and appliances are not big enough to get him appreciable discounts. These houses are often sold before completion, giving the buyer the opportunity to choose materials and appliances. This builder is, in a sense, a small tract builder. Having a choice should result in far greater satisfaction, however, you may not have a choice of the plan as these builders usually limit themselves to certain sizes and styles.
- The rural-farm dwelling builder obviously is a custom-builder offering a choice of plans, materials, equipment and appliances.

It is now apparent which of the two basic methods of building and buying will result in the best home for you. Custom builders, as a rule, do not build enough homes or start large development tracts to afford large exciting advertising campaigns. You may need to seek out your builder by talking to your Banker, Savings and Loan Association, Lumber Dealer and friends. The final result will be rewarding for your efforts.

Actually the first step is to find the home plan of your choice and Garlinghouse Plan Books provide the easiest possible source. Our complete plan library of 18 books show over 1,000 different plans—all styles and sizes. Complete low cost builders plan sets are available for immediate shipment. And please remember a custom built home is better—gives you greater satisfaction—retains its value far longer.

Yours for a better home

THE L. F. GARLINGHOUSE CO., INC.

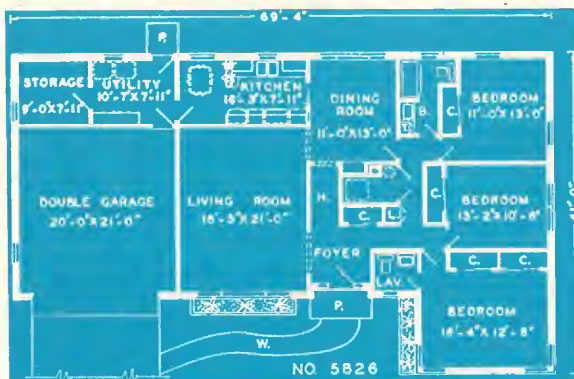

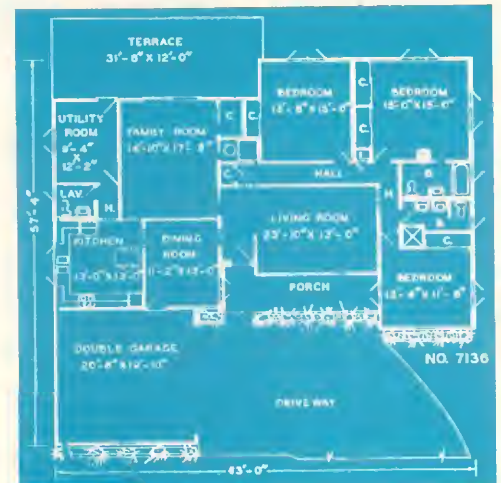

No. 7136—California ranch type home without basement. Large family room with sliding glass door exit to a 31' x 12' terrace. There is also a dining room as well as eating space in the kitchen. No. 6429 — This house is constructed of concrete "bricks," so named because they are much smaller than the average concrete block used in residential construction. When used in a modern design such as this hipped-roof five-room suburban, they create an extremely pleasing appearance. This house is excellently arranged for the average small family. The kitchen, with its continuous cupboards, is highly efficient. The front bedroom has two closets of wardrobe size giving an unusual amount of storage space. Casement windows are used throughout.

HOW TO DO IT BOOKS

CONCRETE HANDBOOK

A Complete Guide to Concrete Work
for Home

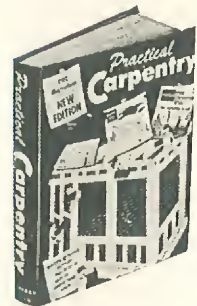

You need no previous experience to put the information contained in this book into immediate time and money-saving use. It is ideal for the home-owner, farmer and general handyman. Explains how to use concrete in building a home, how you can use concrete around the home and on the farm for practical and ornamental purposes. You learn how to lay sidewalks and driveways; build steps, outdoor fireplaces, sandboxes, tennis courts, garden and swimming pools and many other projects with famous step-by-step instructions.

ALL ABOUT HOUSE WIRING

Here's a real "how-to-do-it" book, covering all phases of MODERN house wiring. ALL ABOUT HOUSE WIRING takes the "mystery" out of house wiring. It tells how to determine exactly what wiring is needed; gives you basic wiring fundamentals. It shows in 192 crystal clear drawings, the EASY way to do wiring in both new homes and existing residences; wiring capable of serving SAFELY the lighting, appliance and equipment needs of today, as well as those of tomorrow.

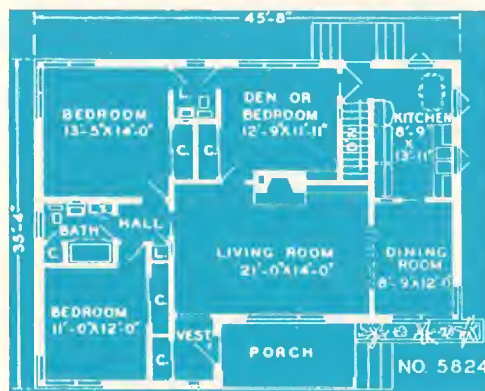

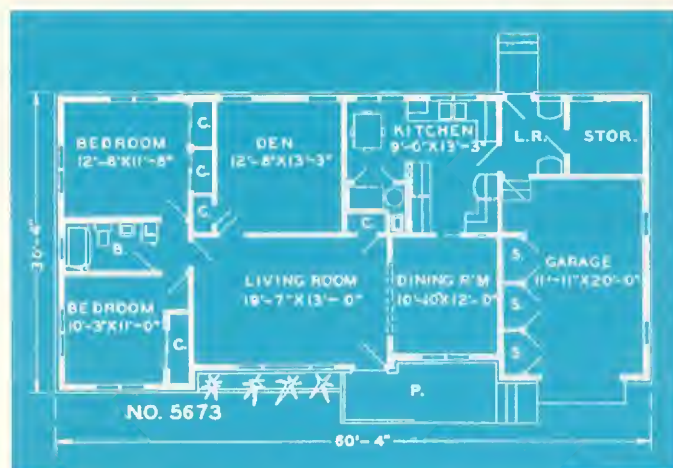

176 pages, 192 illustrations, \$2.50

No. 5673 — Brick veneer is used up to the window line and siding above resulting in a pleasing combination of materials. The plan shows two bedrooms plus a large den which can be used for a third bedroom or multipurpose room. Heater space is provided in area between living room and kitchen. A laundry room and additional storage is provided at the rear and inside of the garage.

No. 7314—This roman brick trimmed contemporary design will certainly be a pleasure in which to live. As an example of good circulation planning, this house is a standout. The kitchen is loaded with built-in cabinets as well as a built-in range and oven. A built-in desk is provided at the end of the breakfast nook. The utility room, containing laundry equipment, is large and roomy. Two large baths serve the bedroom area. The hall bath is compartmented and has two built-in lavatories. The cut stone fireplace acts as a divider between the living room and entry.

No. 7368 — This is a very attractive concrete masonry home. Standard size concrete blocks are used for the exterior walls. Every other horizontal mortar joint has been raked out to achieve the unusual effect. The flagstone foyer is sunken several inches below the main floor level. All three bedrooms are large and each contains two large closets. The living room has been placed at the rear for maximum privacy and convenience. Sliding glass doors open onto the concrete terrace. The kitchen and dining room feature open planning. The kitchen contains a built-in range and oven as well as washer and dryer space, double sink and lots of built-in cabinets. The oven cabinet is placed at an angle which allows a small planter between the oven and wall. This is very attractive. The garage is extra large and provides storage space at the rear.

No. 9532 — This contemporary split level design has just about everything you could want in a home. Three of the four bedrooms open onto the attractive open air balcony. The master bedroom has three large double gliding windows as well as the gable end windows. All this glass certainly provides more than adequate light and ventilation. The master bedroom also has its own full bathroom. The other bedrooms are served by the compartmented bathroom which allows more than one person to use it at a time. This bathroom has a shower in one compartment and a tub in the other. The country kitchen which combines the dining room area with the kitchen is a very popular feature. The mud room, with washer and dryer, and the half bath, right next to the kitchen, will save the busy housewife many steps. The double garage is extra large and has plenty of workshop and storage space. The den could be used for many purposes such as study, hobby room, maid's room or bedroom. The recreation room is very large and has its own woodburning fireplace as well as half bath.

IT WORKS!

A Practical Builder Creation

Smart People Build Before a Boom!

That's Why You Should Build Now!

Many facts and figures in the news today point to the future as a boom period. Inflation is sure to continue, population will constantly increase, jobs will be more plentiful and incomes will increase. A natural sequence of these facts will bring about higher prices for your new home.

If the above economic facts are true, then now is the best time to build. Let us look more closely at these facts.

1. Population will continue to increase. We have seen a tremendous growth the past two years and all indications are that it will increase more rapidly in the next ten years. Where will all the people live? This means more houses and higher prices.

2. Statistics show that more people are employed today than ever before—employment is increasing and unemployment decreasing. With conditions in favor of the laborer, wages will go higher, spending and saving will create a healthy housing market.

3. Income levels for all will rise. The average family income is increasing daily. The economy of the country today points to still brighter futures, which will mean a mortgage debt incurred now will be easier to pay off at a later date.

4. All of this means the value of your home will rise. As we have more people, more jobs and increased levels of income, we will pay a higher price for our homes. The home bought for \$15,000 today may well be worth \$25,000 by the time the mortgage is paid. The home buyer who waits will probably pay much more, therefore, we say, "Smart people build before a boom."

ALL ABOUT HOUSE WIRING

Here's a real "how-to-do-it" book, covering all phases of MODERN house wiring. ALL ABOUT HOUSE WIRING takes the "mystery" out of house wiring. It tells how to determine exactly what wiring is needed; gives you basic wiring fundamentals. It shows in 192 crystal clear drawings, the EASY way to do wiring in both new homes and existing residences; wiring capable of serving SAFELY the lighting, appliance and equipment needs of today, as well as those of tomorrow.

176 pages, 192 illustrations, \$2.50

Once it may have been true that a man's house was his castle, but today it isn't necessarily so. In this new era of houses for almost everyone, a wood, stone or brick structure, is considered only the framework in need of skillful decoration to convert a house into a real home. Small matter whether the design be exotic or simple, starkly modern or modernized — antique, the home must pass with flying colors, not trying colors, the rigorous standards of being strictly personal, truly functional, and unquestionably efficient.

This new emphasis on decorating has brought about many attitudes gratifying to the American Homemakers. No longer does the family leave it all to Mother, but instead they often undertake to do-it-ourselves decorating project. In this sharing their interests, ideas, and needs, the members of the family group are able to create a home atmosphere expressive of their own personality.

Family life, too, in an attractive, individualistic, and comfortable home rises to higher ethical standards. As the ideals of the home ascend to new heights, a definite contribution is made to the structure of our democratic society.

The homemaker herself in her new role as interior decorator finds a decided challenge that is best met if she utilizes both knowledge and good taste. Her job once completed, she feels a great sense of satisfaction in pleasing her family and providing for their needs.

This successful homemaker-decorator has learned that unity of decor was achieved by four basic elements; line, color, texture, and form, each chosen to produce the most pleasing effect.

She also realizes that the design principles, balance, proportion, rhythm, emphasis, and harmony, played an important role in furniture arrangement. When teamed with the basic elements, they achieve beauty as they blend with the background. She is not limited in these home furnishings because many are the varied possibilities available to furnish it at all income levels.

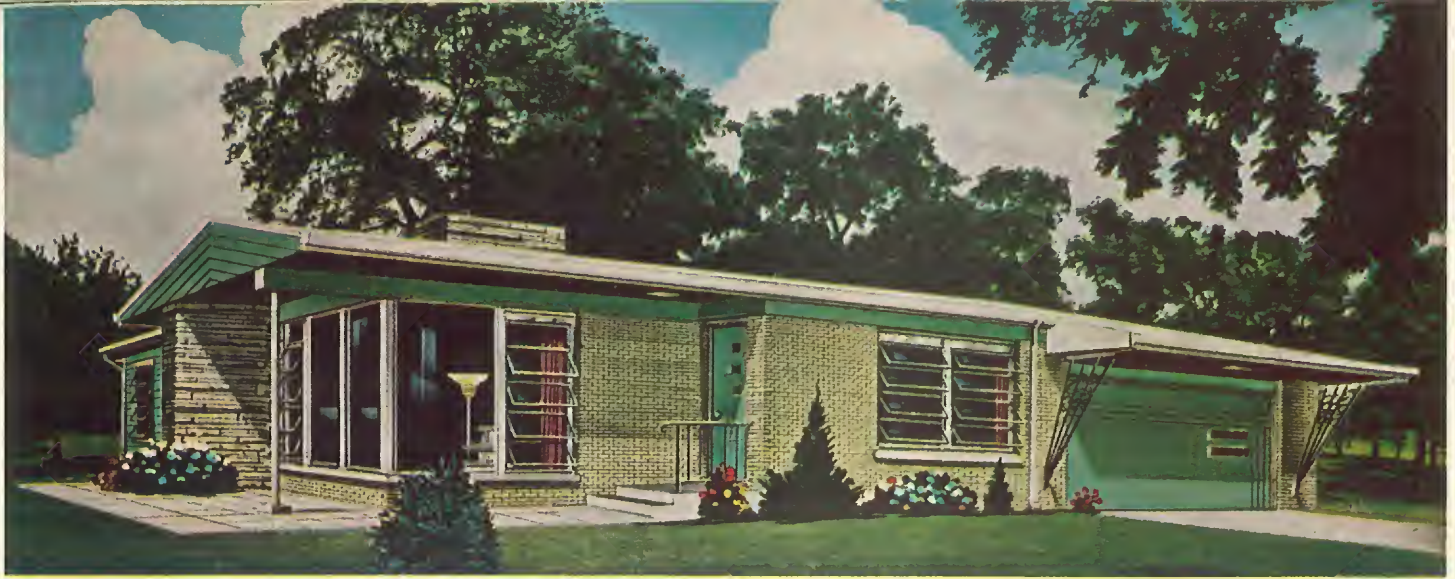

How has she learned these various aspects of home decoration? As her interest grows, many opportunities present themselves to her—exhibition homes which are furnished provide an excellent source of evaluation. Adult classes stress the basic features of interior design and offer opportunity for practical application. Publications and printed materials feature current trends in housing, floor plans, furnishings, textiles, and household hints.

Many other resources are available to the homemaker who is interested in making her home express beauty, charm, comfort, and livability which is characteristic of her family.

The modern home need no longer be just a castle in the old sense, but a glorified palace, rich and beautiful in its own special decoration.

BERNICE FINLEY

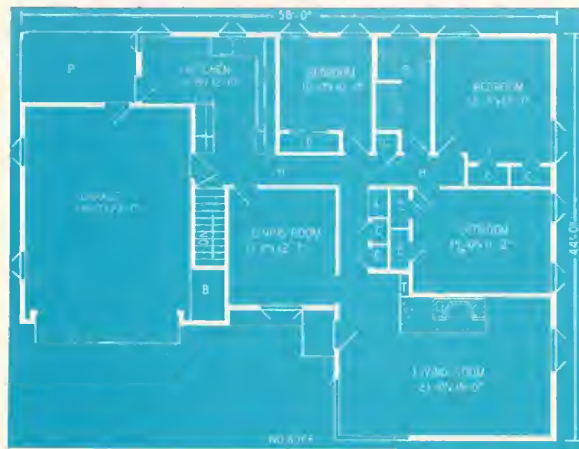

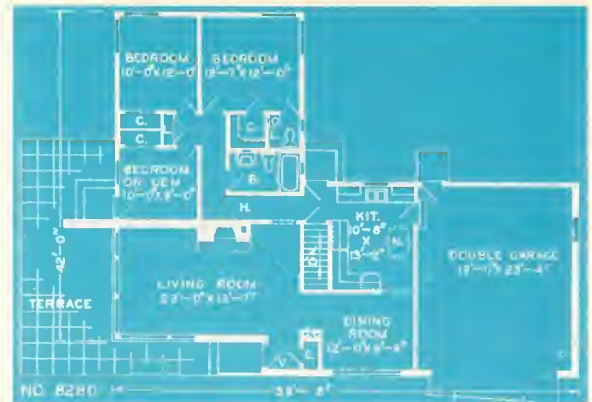

Supervisor of Home Economics
 Topeka Public Schools

No. 8280—A contemporary three bedroom brick veneer home with a low pitch roof. The dining room and the living room are at the front of the house, with the three bedrooms and 1 1/2 bath extended to the rear. There is a double garage at the right and a large terrace area on the left. Full basement with accessible entrance from the rear as well as inside the house.

Basement	1,404
Porch	283

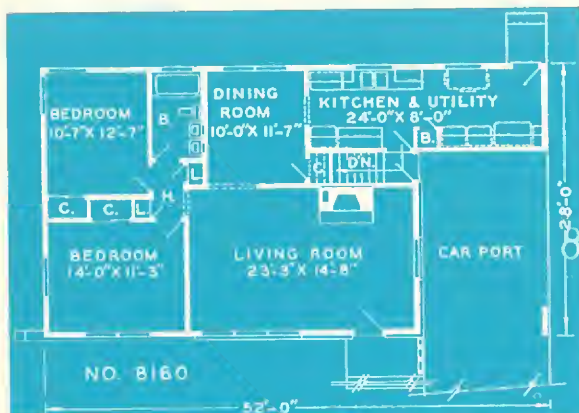

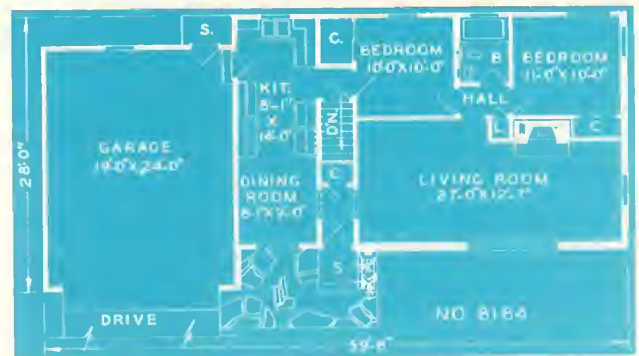

No. 8184 — Here is a very unusual plan. There are many features included here that are often found only in much larger homes. Note particularly the extra large living room—wonderful for entertaining, the entrance hall, combination kitchen-dining area, the full basement, etc. Brick veneer is used only on the front and gives a pleasing effect. House without garage is only 40 feet wide.

Complete plans as shown or reversed, specifications, lumber and mill list \$17.50

First Floor	975
Basement	975
Garage	485

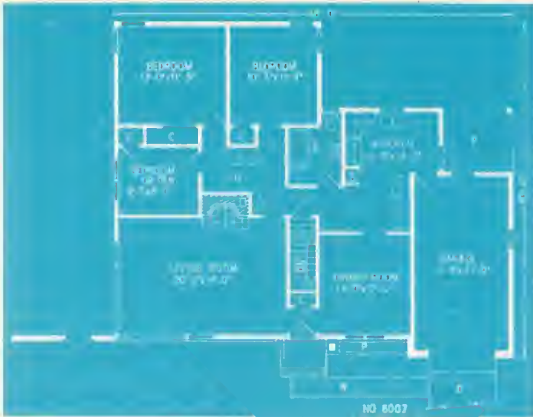

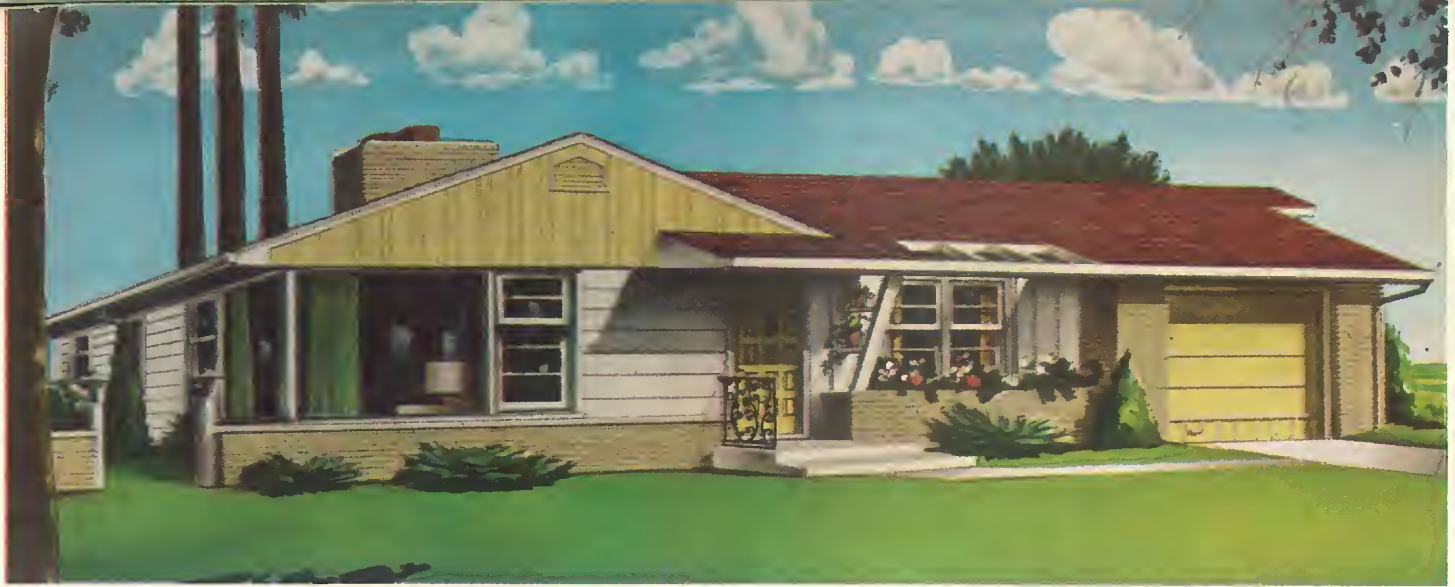

No. 8160—A practical and roomy floor plan is shown with this contemporary flat roof type home. The roof line which is a distinguishing feature of the exterior slopes from the carport side to the bedroom side of the house instead of the general front to rear slope. Plan shows a basement but it can easily be omitted as space has been provided for utilities.

Complete plans as shown or reversed, specifications, lumber and mill list \$22.50

Basement	1,210
Carport	247

No. 8007—Striking beauty with a modern touch. This beautiful home features an outstanding floor plan. The plan shows a large living room, spacious dining room, an efficient kitchen, two bedrooms and a den that is arranged to accommodate a single bed or bunk beds. Note the ease of circulation between rooms.

Garlinghouse Co., Inc., Tapeka, Kansas.

No. 8098 — Three bedrooms are shown in this modern brick veneer home. All rooms have been arranged to provide easy passage between them without sacrifice of efficiency. The U-shaped kitchen is large enough to accommodate a breakfast table as indicated on the plan. If a basement is not desired the stair and hall space could be used for a utility room.

No. 6124 —The large corner windows in the spacious living room denote real enjoyment, you will also note the room has two outside exits. The dining room and kitchen are conveniently located with an exit from the kitchen to the double garage. The three bedrooms are located across the back of the home with 1 ½ baths available. There is a large terrace at the rear of the garage. The roof is of a low pitched type.

No. 8300—The Present home calls for a family room. This plan has not only a large family room but a 25' living room with interior fireplace. Three bedrooms with two full baths. Terrace just outside the family room and a full basement. The vertical siding and the brick veneer help to make this an attractive home.

Garage	562

No. 8056 — Suitable for a 50-ft. lot, this three bedroom design with attached garage will be popular with the homebuilder having a limited space in which to build his new home. The rooms have been arranged to provide easy passage between them. The use of stone for the fireplace chimney and plant box adds to the attractiveness of the design.

The most satisfactory way of obtaining an accurate estimate of the cost of the house that you intend to build is to purchase a set of plans and have your material dealer or contractor figure directly from those plans. Then there is no error, which is often the case if approximations are made on a square-foot basis.

No. 8132 — Truly a ranch house designed for the wide open spaces. Many outstanding features are incorporated into this beautiful home. Note the size of the various rooms particularly the living-dining room and the excellent window treatment across the entire front of the house. A planting box is used for dividing the living and dining area but does not cut down the spacious effect of the long room. The screened porch, open porch and terrace invite outdoor living.

STOP WASTING FIREPLACE HEAT

build masonry around

HEATFORM®

WARM AIR-CIRCULATING FIREPLACE UNIT

BEFORE YOU BUILD OR REMODEL, obtain complete information about HEATFORM, which captures and circulates through the home a large volume of heat lost up the chimney by the ordinary fireplace. A HEATFORM fireplace is the heart of the home — no other modern convenience contributes more to comfortable living.

HEATFORM is a complete unit, hearth to flue, and a **PERFECT GUIDE** around which masonry walls are easily built, **ASSURING SMOKE-FREE OPERATION.**

HEATFORM is a part of the fireplace. It replaces the masonry firebox lining and throat damper and saves some labor necessary in the construction of the ordinary fireplace. The small extra cost of HEATFORM is returned many times over in fuel saved and added comfort.

HEATFORM is available in five models and various sizes. **THE ARCHITECTURAL DESIGN OF THE FIREPLACE IS UNLIMITED. INSIST UPON HEATFORM.** For efficiency and durability, **IT HAS NO EQUAL!**

SUPERIOR HI-FORM DAMPERS

Where the extra volume of heat captured and circulated by HEATFORM is not required, use the TIGHT-CLOSURE Superior HI-FORM DAMPER, which forms the complete throat from lintel to smoke flue, **ASSURING SMOKE-FREE OPERATION.** Made of heavy steel for lifetime service — **NO BRITTLE CAST IRON PARTS TO BREAK.**

The rockwool blanket furnished with HEATFORM and HI-FORM DAMPER is the only proven method of absorbing metal expansion to prevent masonry cracking.

Model "L" for single opening tapered fireboxes only.

Model "MH", complete with fuel grate and copper-hammertone finish hood.

Model "A" for single opening fireplace.

Model "S" for corner fireplace with view of fire from front and either side.

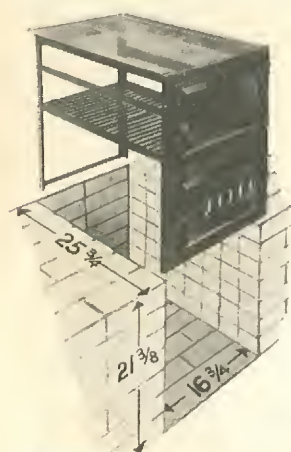

Model "M" provides view of fire from front and both sides.

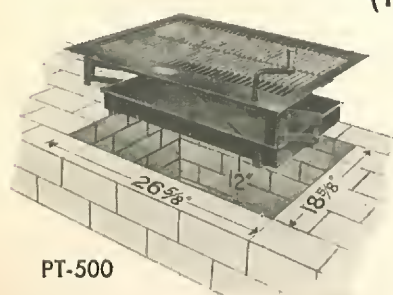

Model "D" for the fireplace opening through between two rooms.

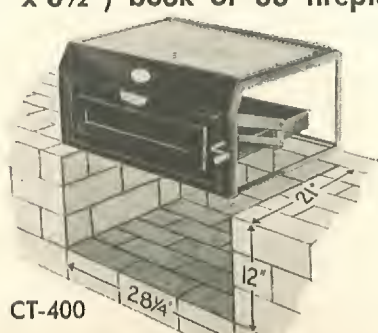

Model "H" for multiple opening square fireboxes.

OD-300

PT-500

CT-400

Feastmaster BARBECUES
